A

ACCIDENTS AND ACCIDENT PREVENTION
- Safety rules for power plant operators. F. L. Ray 200
- Accumulator permits constant firing of pulp-mill boilers *394

AIR COMPRESSORS
- Grouting a compressor bedplate with molten metal. J. W. Reynolds, Jr.... 596
- Isothermal and adiabatic compression.. 676
- Motor drives for air lift compressor. E. C. Dieffenbach *914
- Operating two stage compressor single stage 560
- Silencing the compressor muffler. M. C. Cockshott *745
- Steam engine operated by air or motor generator set efficient? Cilley, MacCorkle, Phillips, Knoy, Livingston, Marley 964
- Synchronous motor drives two air compressors. Olive, Rivett & MacCorkle.. 598
- Two speed synchroous motors drive compressors. H. E. Larson *138

Air conditioning—Servicing the Carew Tower Building of Cincinnati. Rudy Lowe *616

American Boiler Manufacturers Association—Automatic welding and smoke regulation discussed 972

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
- New equipment featured at convention. 196
- Tests made on carbon brushes operating in hydrogen 307

American Society for Steel Treating & American Welding Society — X-rays, radium and magnetic inspection discussed 490

American Society for Testing Materials—Fuels, piping codes, alloys, corrosion discussed 532

American Society of Civil Engineers—Annual meeting 157

American Society of Heating & Ventilating Engineers—Annual meeting 272
- Reorganizes research activities 861

American Society of Mechanical Engineers—Birmingham meeting covers wide field 674
- Discusses welding with American Welding Society 198

American Society of Refrigerating Engineers—Meet at Kansas City 788

American Welding Society—Discusses welding with American Society of Mechanical Engineers 198
- Quality welding discussed at meeting.. 711

American Welding Society & American Society for Steel Treating — X-rays, radium and magnetic inspection discussed 490

Ash handling—Ashes—an asset? K. Rankin 176
- West Station — ash handling. Arnold Weisselberg *301

Association of Iron & Steel Electrical Engineers — Anti-friction bearing lubrication investigated 1003
- Convention and exposition in Cleveland.1010

Automobiles—Automatic elevator for parking *732

Awards—Annual safety awards to be made at Hoover Dam 1049
- N.E.L.A. awards made 1011

Page

B

BEARINGS
- Hand scraped (Ed.) 727
- Hand scraping of bearings. C. J. Mason 998
- Hand scraping of oil engine bearings. L. H. Morrison *742
- High temperature reduces bearing friction 786
- Schedule of inspection and overhauling. Ross, Nichols, Erion, White 677

BELTS
- Best method of joining. O'Regan, Hoyles, Swift, Darling, Schaphorst, Brodie, Ferrand, Welch 638
- Reversing a double leather belt 888
- Two motors drive belt conveyor. E. E. Renshaw *70

Berlin power plant to be bought by Americans 498

Binary fluid turbines 566

Blowers—Propeller blowers ventilate turbine-generators. C. M. Laffoon *296

BOILERS
- Accumulator permits constant firing of pump-mill boilers (Restigouche mill of Fraser Cos.) *394
- Aircooled boiler settings of special design used by Ford at Dearborn.....*1018
- All welded boiler drum for Louisiana plant (Brown Paper Mill Co.).....*913
- Ample breeching areas desirable. D. J. Allison *344
- A.S.M.E. boiler code covers welded power boilers 445
- Automatic boiler control as a safety factor. W. H. Monahan *995
- Baumann proposes multiple-superheater boiler 35
- Benson generator used for ship propulsion 422
- Bent diagonal stay 676
- Best method of fastening heavy belts. L. R. Baker 1000
- Boiler feed water analyses and their interpretation. J. D. Yoder 1021
- Boiler room of the future — National Fuels Meeting 334
- British Columbia adopts uniform boiler rules 931
- British super station has refractory faced water walls *542
- Calculating the working pressure of a locomotive type boiler *600
- Champion Forge installs coal silo and big boiler *507
- Circulation research needed (Ed.)..... 866
- Clarkson waste-heat boiler, tests reveal efficiency. Thomas Clarkson.....*156
- Cracking of boiler metal identified. F. G. Straub *809
- Coal fired boilers supplement electric steam generators (Canadian International Paper Co.) *728
- Cutting steam costs in small plant. K. D. Knoblock (Wisconsin Southern Gas Co.) *689
- Double cross-drum boilers in Hell Gate extension each produce 1,000,000 lb. of steam an hour *356
- Electric steam boilers (C.E.A. Convention) 1002
- Explosion of thirty-three-year-old boiler.*861
- Fairfield blast furnace power plant discussed at A.S.M.E. meeting..... 675
- Furnace volume to use with 1,500 sq.ft. water tube boiler. Calhoon, Lyle.... 715
- Gennevilliers, France, installs single pass fine tube boilers *954
- Gennevilliers, French station (Ed.).... 942
- How to lay out a factor-of-evaporation chart. G. R. Hahn *477
- Improved design increases steam capacity (Des Moines Electric Light Co.)....*736
- Inspection of mud-drum head inspection (Ed.) 650
- Lighting pulverized coal with gas. C. W. Swenson (New Yorker Hotel) .*912
- Locomotive terminal boiler plant. L. C. Winship *446
- Loeffler boilers ordered for Czechoslovakian plant 461
- Loeffler boilers installed in Moravska-Ostrava 899
- Low cost high efficiency industrial boiler plant. A. M. Kinney (Emery Industries, Inc.) *944
- Mercury unit at South Meadow being repaired (Hartford Electric Light Co.)*605
- Mercury vapor turbine generator to be built at Schenectady for General Electric 124
- Misplace I-beams in a boiler setting. G. M. Galvin *784
- Natural gas proves best boiler fuel. H. K. Blanning *776
- N. Y. Legislature introduces bill for boiler inspection 605

Page

- Phosphate deposits eliminated by quick feed (Anheuser-Busch). A. B. Stickney 947
- Radiation in boiler furnaces—National Fuels Meeting 333
- Research work in progress in 1929, 1930 or 1931 833
- Results of boiler tests run at Midwest Power Exposition 415
- Sales for three months of 1931 757
- Size of boiler to generate 3,000 lb. of steam 964
- Slag-tap furnaces—National Fuels Meeting 331
- Slow blowdown for boilers. W. E. Warner *636
- Stepped boiler drums. F. E. Wertheim .*962
- Stepped boiler drums used in Germany.*662
- Stoker setting for Scotch marine boiler. Harry Himelblau *72
- Trend toward large units *17
- Unaccounted losses in boiler tests—National Fuels Meeting 333
- U. S. Navy uses welded boilers *734
- Valmont plant—new boiler goes on line 385
- Valves and boiler fittings for 1,900 lb. and 900 deg. Belohlavek & Herschmann *1028
- Waste heat boilers at Hungtonton Works (International Nickel Co.) *510
- Waste-heat boilers for new steel plant (Great Lakes Steel Corp.) *363
- Waste heat recovery in oil engine plants. Major W. Gregson *917
- Water level stabilized in receiving tank. A. J. Dixon *635
- Water walls add 50% to boiler capacity (Murray Corp. at Detroit) *620
- Welding boiler joints. C. W. Carter, Jr. 521
- Working pressure on 48 in. drum. Lyle, Jared, Lorenz 750
- Zone air control for underfeed stokers increases boiler capacity. Griswold & Brown *980

BOOK REVIEWS
- A.S.M.E. 1930 boiler code 562
- Adventure of science. Benjamin Ginzburg 76
- Amber to amperes. Ernest Greenwood.. 195
- American Diesel engines. L. H. Morrison 380
- Arithmetic investigations of heat transpositions in the locomotive boiler barrel. Dr. U. Barske 381
- Business adrift. W. B. Donham..... 890
- Chemical technology of steam raising plant. H. N. Bassett 716
- Compressed air plant. Robert Peele.... 76
- Economic control of engineering and manufacturing. F. L. Eidmann..... 563
- Elementary electricity. Edgar Slack.. 380
- Elements of thermodynamics. E. M. Fernald 891
- Embrittlement in boilers. F. G. Straub 564
- Handbook of oil burning. H. F. Tapp... 891
- Heating and ventilating degree day handbook 381
- Heating and ventilation. Allen & Walker 717
- History of science. W. C. Dampier-Whetham 563
- "Hutte" des Ingenieurs Taschenbuch, v. 1 717
- Hydraulics. F. C. Lea 562
- Hydraulics for engineers. R. W. Angus. 890
- Industrial accident prevention. H. W. Heinrich 564
- Internal combustion engines. J. A. Polson 716
- Keystone coal buyers catalog and directory 716
- Materials standard—A.S.T.M..... 76
- Mercury arc rectifiers. Marti & Winograd 77
- Modern diesel engine practice. Orville Adams 563
- Modern steam turbine. E. A. Kraft 195
- Oil conservation and fuel oil supply.... 77
- Patent laws for chemists, engineers and executives. F. H. Rhodes..... 890
- Practical marine diesel engineering. E. R. Ford 891
- Preventive management: mental hygiene in industry. H. P. Elkind..... 380
- Principles of engineering thermo-dynamics. Kiefer & Stuart 194
- Safety methods in power-system construction 76
- Smithsonian report 194
- Soviet foreign trade: menace or promise. Budish & Shipman 716
- Standard wiring for electric light and power. H. C. Cushing, Jr. 717
- Steam turbines. T. M. Naylor 77
- Treatise on leather belting. Haven & Swett 562
- Twentieth century book of recipes, formulas and processes. (Ed.) by G. D. Hiscox 563
- Why recognize Russia? Louis Fischer.. 716
- World's economic dilemma. E. M. Patterson 381
- British thermal unit 926
- Burners handle oil, gas and pulverized coal simultaneously *1042

(*) Illustrated. (Ed.) Editorial.

PUBL. LIBRARY DETROIT MICH.

Page

C

Cables—Standard control-cable color code approved. G. Sutherland 80
Canadian Electrical Assn.—Convention has practical engineering program.....1002
Chimneys—Economical design of natural-draft chimneys. J. G. Mingle.....*364
Inspecting steel stacks. J. F. Hobart.*1037
Repairing square brick stack *886
Chrysler building has pumps on three levels. F. E. McArdle *370
Clutch design. J. R. Fortune.....*487

COAL
Bituminous byproducts—National Fuels Meeting 332
British super station has flooded coal storage, stoker firing plus pulverized coal *542
Buying coal for profit (Ed.) 540
Buying coal for profit. G. B. Gould.... 545, 588, 622, 663
Champion Forge installs coal silo and big boiler *507
Coal flow diagram for Salem's 150,000 Kw. plant *628
Diffusion as a factor in burning pulverized coal. Douglas Henderson.... 288
Does wetting coal improve combustion? L. R. Baker 73
Does wetting coal improve combustion? Barth, Longstreet, Brown 486
Flue gases effective for mill drying (Ed.) 866
Grindability of coal 929
Grindability of coal discussed at A.S.M.E. meeting 675
Importance of mixing in burning pulverized coal—National Fuels Meeting 331
Iowa coal burn successfully 750
Lighting pulverized coal with gas. C. W. Swenson (New Yorker Hotel).....*912
Lignite coal burned by power plants in Canada. A. K. Spotton 558
Loss to ashpit 1039
Low volatile coals and high volatile slack. J. C. Hutton 787
Midwest Bituminous Coal Conference.... 892
Missouri-Kansas coals—National Fuels Meeting 334
Neglected coal markets (Ed.)..... 577
Outlook not all black (Ed.) 54
Parsons line (Ed.) 905
Pawlikowski coal dust engine tested in Czechoslovakia *515
Pulverization of anthracite *747
Sampling of pulverized coal for screen analysis. P. Franks *557
Service to anthracite consumers — National Fuels Meeting 330
Standards urged for "clean" bituminous coal 1048
Volatile gases in coal 676
Why house coal bunkers? (Ed.)..... 171
Coal dust recovery at Toronto Station. W. S. Johnston *409
Coke. See Coal.

COMBUSTION
Chart for sensible heat loss in dry flue gas. A. Puishes *294
Does wetting coal improve combustion? L. R. Baker 73
Does wetting coal improve combustion? Barth, Longstreet, Brown 486
Importance of mixing in burning pulverized coal—National Fuels Meeting 331
Research work in progress in 1929, 1930 or 1931 834
Thin fires and high induced draft. Maurice Ratel 151

COMPRESSORS—GAS
Direction of rotation of compressor.... 714
Gas compressor plants: hints on their design and construction. M. C. Cockshott *406
Gas cooling system for two-stage compressor. M. C. Cockshott *113
Gas lift used in oil fields. E. C. Dieffenbach *914

CONDENSERS
Determining causes of condenser tube corrosion. Bert Houghtno *822
Propeller-type pumps serve condenser (Reed Station of Duquesne Light Co.). J. W. McNutly *62
Relation of air ejector capacity to condenser capacity. Dreyer, Frazer, Hahn 752
Research work in progress in 1929, 1930 or 1931 835
Surface condenser improveemnts (Ed.) 689
Trends in steam prime movers *11
Turbine condenser-syphon seal to be used? Sorrells, Robinson, Bradshaw.. 889
Weight of air in condenser 1006

CONTROL
Automatic boiler control as a safety factor. W. H. Monahan.....*995
Automatic control for industrial gas producers. R. L. Willis *671
Automatic control for refrigerating machinery. R. S. Wheaton *59
Damper control proportions air for oil furnace. H. M. Spring..... 886
Fan controls lowering speed of gate hoist (Chute-Caron plant of Alcoa Power Co.). F. Newell *148
First multiple unit diesel power plant with full automatic control. E. J. Kates (Hotel Chelsea) *990
Heating system control. Wm. Anderson 485
Power factor controlled automatically. Aubrey Smith *632
Saluda plant operation centralized under one head by system of remote control and signal devices (Lexington Water Power Co.). Hooper & Garvin.....*290
Standard control-cable color code approved. G. Sutherland 80
Zone air control for underfeed stokers increases boiler capacity. Griswold & Brown *980
Conveyor, belt driven by two motors. D. E. Renshaw *70

COOLING TOWER
Building heating with refrigeration equipment (Southern California Edison Co.) *948
Cost of cooling water depends upon the system. Edwin Burhorn *180
Gas compreessor plants: hints on their design and construction. M. C. Cockshott *406
More data needed. E. Burnham 73
Spray nozzle distribution for cooling towers. M. C. Cockshott 783

CORROSION
Brine corrosion retarder *786
Building specifications as a piping engineer views 520
Determining causes of condenser tube corrosion. Bert Houghton *822
Investigation of corrosion by flue gas. H. F. Johnstone *824
Investigation of materials to reduce steam turbine blade wear. J. L. Ray.....*804
Oxygen tank corrosion 560
Pressure vessels corrosion proof *669
Research work in progress in 1929, 1930 or 1931 836
Rust remover 676
Water heaters 379
Water heaters. H. C. Dyer 559

COSTS AND PERFORMANCE
Buying coal for profit. G. B. Gould.. 545, 588, 622, 663
Charts for determining relative cost of fuels. G. W. Heald 182
Cut cost with records (Ed.)..... 726
Comparison of British and American Diesel costs reveals close similarity.. 514
Cutting steam costs in small plant. K. D. Knoblock (Wisconsin Southern Gas Co.) *698
Getting the most out of existing equipment. W. D. Lawson 768
Heat, light and power costs in hotels (Ed.) 281
Heat and power costs in hotels. H. E. Nelson 635
Heat, light and power costs in hotels. M. W. Palome 523
Heat, light and power costs in hotels. A. S. Vincent 412
Heat, light and power costs in New York City hotels. E. C. Rominie..... 304
Metered power services spell economy in hotel operation (New Yorker). W. D. Lewis *984
Parsons line (Ed.) 905
Power costs for cotton ginning. Orville Adams *68
Power service management by unit costs (Ed.) 502
Raritan River plant combines efficiency wtih low investment cost (Eastern New Jersey Power Co.) *94
Ten years' operation of a diesel plant.. 875
Cranes—traveling cranes built of aluminum alloy. E. C. Hartmann *518

D

Dams. See Water power.
Detroit's new Springwells pumping station *468
Diesel engines. See Engines, internal combustion.

DIPHENYL-OXIDE
Heat storage. J. J. Giebe 963
Specific heat of diphenyl-oxide. J. W. F. MacDonald 887
Used to preheat air in Bremo Bluff station *707
Used for preheating (Ed.) 688
Dust elimination. See Smoke abatement.

E

Economizers — Rotating economizer. A. Weisselberg *150
Two-stage feed pumps protect economizer. A. J. Dixon 301

ELECTRICITY
Alarm devices silenced by auxiliary relay. A. C. Finney *744
Ammeters wrongly connected. A. J. Dixon *708
Auto transformers for starting induction motors. Andrew Holt.....*508
Automatic synchronizer uses vacuum tubes *769
Banding wire sizes for armatures and rotors 983
Bracing coil ends of stator windings. A. C. Roe *596
Circuit breakers, air, cadmium and silver plated *960
Circuit faults located. G. R. Hahn 114, C. W. Hope *113, B. P. Robie.....*114
Control battery used for emergency lighting. R. E. MacKay *299
Controlling power factor automatically Aubrey Smith *632
Converters, largest 25 cycle synchronous.*884
Cooling transformers. J. B. Gibbs.....*548
Cutting a coil out of induction motor stator windings 1006
Determining average demand of fluctuating loads. A. S. Albright 301
Direct way by which electricity can be obtained from sun's heat? Shurman, Bowers, Black 1040
Distribution systems for industrial plants —A.I.E.E. convention 197
Double brush-holders improve D.C. machine operation. A. M. Harrison....*586
"Ear" detects machinery noises..... *99
Electric resistance brazing may become more general 455
Electric steam boilers (C.E.A. Convention) 1002
Electrical distribution—Midwest Power Engineering Conference 320
Electron—midget ruler of the universe. 455
Electron tube in power supply (Ed.)... 430
Electron tubes in industry — A.I.E.E. convention 197
Field winding short circuit causes generator to vibrate. A. N. Simmons (Trenton Channel Plant) *1001
50,000 kva. hydrogen-cooled condenser.*386
Fire guard in oil filled electrical equipment (Ed.) 978
Fires in oil filled electrical equipment (C.E.A. Convention) 1002
Flash barriers for rotary converters. T. E. Miller 377
Flywheel effect required for synchronous motors. H. E. Larson *297
Ground detector for three-phase circuits. R. E. Mackay 189
Helical groove improves operation of commutator and slip rings. G. M. Little *491
Hydro electric units operated as condensers (Penn. Water & Power Co.). H. A. Von Eiff *666
Lamps have short life 524
Lighting circuit has unusual combination of grounds. L. L. Pollard *710
Load on transformers 1039
Maintenance brings its reward. R. Holt 185
Maintaining good brush contact on slip rings. C. A. H. MacDonald.....*1036
Mercury-arc power rectifiers; their construction and operation. W. E. Gutzwiller *950
Mercury-arc rectifier for high rating ..*110
Mercury-arc rectifiers, increases power for 415
Methods of correcting power factor. J. R. Dunbar, R. H. Parrish, C. N. Johnston 190
Mimic buses on switchboards help visualize system. E. G. Bern.....*551
Municipal light plant sells current to public utility. B. B. Smith..... 582
Neon signs, capacitors correct power factor. C. C. Nelson 147
Oil circuits breaker—A.I.E.E. convention 196
Phasing-out alternators 750
Power output in first quarter shows little change 673
Progress in electrical field in 1930.... *27
Proper fusing of circuits prevents power interruptions. G. H. Emerson..... 597
Protection, type of protective equipment and how it should be applied. H. D. Braley *872
Reactor dried out by using electric heater. R. B. Glen *998
Reactors, oil immersed current-limiting.*956
Re-exciting loaded alternators in parallel with others. Higgins & Wild 1041
Research work in progress in 1929, 1930, or 1931 837
Shunt-field connections in D.C. machines, flexible wire best. R. E. MacKay.... 43
Short circuit starts fire in paper mill.. 641
Single-phase operation blows motor fuses. Henry Mulford *189
Soldering to make good electrical connections. William Butters 909
Steam engine operated by air or motor generator set efficient? Cilley, MacCorkle, Phillips, Knoy, Livingston, Marley 964
Stroboglow applied to industry *721
Substation outdoors in Juneau, Alaska..*544
Switchboard panels made of rustless steel *506
Switchgear, metal enclosed oil-filled...*625
Tape applied to armature and field coils. A. C. Roe *923
Testing transformers must have sufficient capacity. M. C. Maguire 300
Tests made on carbon brushes operating in hydrogen—A.I.E.E. convention.... 307
Thyratron magic 325
Transformers have adjustable inherent reactance *69
Two-speed synchronous motors drive compressors. H. E. Larson *138
Voltage drop at power plant. Cilley, Towne, Williams 787
Westinghouse testing laboratory has 100,000 Kva. capacity *949
What is good insulation on electrical machines? J. L. Rylander *438
Wreck of generating unit caused by careless setting of circuit breaker. R. E. MacKay 345
Electron. See Electricity.

(*) Illustrated. (Ed.) Editorial.

Page

ELEVATORS

Automatic elevator for parking automobiles *752
Elevator room ventilation needs further study (Ed.) 904
Forced ventilation cools elevator-motor rooms. J. K. Campbell *1032
Higher speeds proposed *30
Measuring stick for elevator service. H. B. Cook 556
Operating elevators to reduce passenger waiting time. H. B. Cook 877
Operating two elevator cars in one hoistway. H. D. James *100
Servicing the Carew Tower Building of Cincinnati. Rudy Lowe *616
Two elevators in one hoistway (Ed.) 93
Emmett, W. L. R.—autobiography of an engineer (Ed.) 764

ENGINEERING EDUCATION

Challenge to engineers (Ed.) 466
Challenge to engineers. C. T. Baker 636
Drive home (Ed.) 615
Engineer economists (Ed.) 904
Engineering education—market problem (Ed.) 867
Jobs that need consulting engineers (Ed.) 978
One solution to the power plant engineer's problem. Orville Adams 344
Personal equation may determine engineer's progress. A. E. Pitcher 450, L. D. Ross 671, J. S. Topp 745
Personnel training is a big factor in the plant betterment program. Marin Phillips 71
Reader values technical publications. A. K. Bay 558
This year's college graduates (Ed.) 1017
Words, facts and truth 158
"Engineering Societies Monographs" (Ed.) 765
Engineering terms misapplied. D. J. Allison 744
Engines—Pressure-reducing valves in steam supply to engine. A. J. Dixon 522
Tugboat engine with exhaust connection. Orville Adams *559

ENGINES—INTERNAL COMBUSTION

Carbon monoxide in Diesel engine crank cases. W. S. Brown 43
Carbon monoxide in Diesel engine crankcase. W. W. Dingwall 376
Comparison of British and American Diesel costs reveals close similarity .. 514
Controlled-stroke pumps for solid injection Diesels *700
Cotton ginning, power costs. Orville Adams *68
Damper control proportions air for oil furnace. H. M. Spring 886
Dennison Mfg. Co. has three sources to supply power *690
Device to stop vibration of overhead exhaust muffler. M. C. Cockshott *449
Diesel engine bids, Sikeston, Mo., municipal power plant 112
Diesel engine drives for refrigerating plants. Nonnenbruch & Neeson *142
Electric welding used for repairing gas engine pistons. R. C. Laney 1000
Experimental Diesel with self contained blower *587
First multiple unit Diesel power plant with full automatic control. E. J. Kates (Hotel Chelsea) *990
Fuel pumps for solid injection Diesel .. *480
Gas engine efficiency raised by improved details. V. L. Maleev *186
Gas and oil engine developments *20
German semi-Diesel engine. E. P. A. Heinze *552
Government purchase of foreign Diesels. Robertson Matthews 672, H. M. Renner 595, R. G. Willoh 745
Hand scraping of oil engine bearings. L. H. Morrison *742
Heat loss through engine valves 714
Mechanical losses in two-cycle oil engines. Alfred Petters 660
Often the fuel oil is at fault. Soren Sorensen 925
Oil engine possibilities in the public utility field (Ed.) 576
Oil engines in a Texas asphalt mine. Orville Adams *298
Oil engine manufacturers have not fallen down (Ed.) 132
Oil engines—Midwest Power Engineering Conference 323
Pawlokowski coal dust engine tested in Czechoslovakia *515
Research work in progress in 1929, 1930, or 1931 847
Scheduled maintenance insures Diesel reliability. T. A. Burdick *442
Solid injection Diesel depends on fuel spray research. P. H. Schweitzer *819
Suitability of fuels for Diesel engines. L. R. Ford *361
Supercharging is one answer (Ed.) 354
Ten years' operation of a Diesel plant. 875
Test of Diesel governor for A.C. drive. Kerr & Kauffmann *774
Three thousand hp. Diesel for Freeport, N. Y., municipal plant. L. H. Morrison *626
Waste heat recovery in oil engine plants. Major W. Gregson *917

ENGINES—STEAM

Corliss engine—removing piston 888
Early American steam engines. J. F. Grace *746
Fitting old pistons with new packing rings. A. J. Dixon *413

Page

High-pressure steam engines — Midwest Power Engineering Conference 323
Reciprocating engines used in Philip Carey plant. A. D. Blake *780
Simplifying the taking of indicator diagrams. J. T. Towlson *963
Trends in steam prime movers *11
Equipment — Cramping the style of good equipment (Ed.) 651

EQUIPMENT, NEW

Air compressor, small portable *897
Air-conditioning unit. Sturtevant Co.. *419
Alarm water column. Wright Austin Co. *309
Atmospheric cabinet to take place of radiators *896
Backstop for preventing shaft reversal. *754
Balancing machine, semi-automatic dynamic. Tinius Olsen Testing Machine Co. *382
Bearing, oil circulating shaft *792
Bearings, hard bronze 971
Boiler cross baffles with curved corners. *933
Bucket loader for small size coal *603
Burner, high-pressure water cooled. Lee B. Mettler Co. *383
Bushing, roof *531
Car puller, electrically operated. Webster & Weller Mfg. Co. *162
Chain-grate, junior, for boilers. Illinois Stoker Co. *457
Circuit breaker, indoor oil. Condit Electrical Mfg. Corp. *495
Circuit breaker, indoor-type. Condit Electrical Mfg. Corp. *459
Clutch, improved centrifugal. Hill Clutch Machine & Foundry Co. *161
Clutch, one way positive *529
Coal feed regulator for small underfeed stokers *678
Comparator for phosphate determination. *679
Compensator, bearing clearance *530
Compression fittings and tubing for small service lines *1045
Conduit which permits hand bending ... 753
Control, oil-level for machine bearings. *643
Control unit for synchronous motor-generators. Melton Control Co. *120
Controller, liquid-level *792
Conveyor, flight. Barber-Greene Co. *120
Cooling coil for test water *604
Cooling tower, spray-deck with primary and secondary louvers. Marley Co.. *494
Coupling, cross-type. Smith & Serrell. *459
Coupling designed for wide angularity and misalignment *603
Coupling, medium-duty. Poole Engineering & Machine Co. *123
Coupling with rubber balls as flexible member *678
Crane, general utility portable *971
Crane, tractor-mounted swing. Fred H. Poor *123
Cutting torch, gasoline. Torchweld Equipment *82
Desuperheater with thermo-hydraulic governor. Swartwout Co. *160
Device located hidden ducts and outlets. *1045
Drill and hammer, electric. Wodack Electrical Corp. *201
Drive, multi speed and motor *753
Drive, shaker conveyor. Conveyor Sales Co. *40
Dust collector, multi-cyclone. Prat-Daniel Corp. *121
Electro-chemical feeding systems *680
Electrode, heavy welding. General Electric Co. 419
Electrodes, fluxed 603
Electrode for arc welding stainless steel 679
Elevator, duplex, uses standard squirrel-cage motors *970
Feed-water unit, automatic. Steam & Combustion Co. *494
Feeder, constant-weight *933
Firebrick, grooved *1009
Flame analyzer with recorder and pressure governor. Brown Instrument Co. *495
Flat-belt drive, improved short-center. Rockwood Mfg. Co. *493
Floodlight, general utility *529
Flow-meter bodies for high pressures. Republic Flow Meters Co. *123
Fuse reducer for standard fuse holders. *1045
Gage, high-pressure water. Reliance Gauge Column Co. *160
Gage, mercury column *970
Gage, Selsyn-operated remote indicating. *567
Gage, water, inclined. Wright-Austin Co.. *459
Gage for high pressures. Consolidated Ashcroft Hancock Co., Inc. *83
Gas analysis instrument, improved flue. Defender Automatic Regulator Co. *160
Governor for turbine driven feed pumps. *643
Grinders, commutator *1008
Grinds to replace coils in refrigerating systems. American Engineering Co. *382
Heat reclaimer, self cleaning *529
Heater, air, channel-type. Prat-Daniel Corp. *159
Heater, unit gas air. General Gas Light Co. *418
Hog for reducing wood waste *530
Hoist, chain, of aluminum alloy *603
Hoist, chain and wire rope. Chisholm-Moore Hoist Corp. *418
Hoist, electric industrial *531
Hoist and trolley, motor-operated. Shephard Niles Electric Crane & Hoist Corp. *201
Hydro-generator for emergency lighting. Fitz Water Wheel Co. *122
Hydrometer for continuous blowoff *642
Inclosure for motor *531
Indicator, fluid level. J. H. Bunnell & Co. *308
Insulation, rock wool pipe *897

Page

Jet pipe used in hydraulic control of boilers *932
Joint, universal, gives constant angular velocity *531
Lifting machines, hand and motor-operated. Economy Engineering Co.. *291
Liquid-level control for refrigerating evaporators. Grinnell Co. *81
Locomotive, industrial, with five speeds forward. Brookville Locomotive Co.. *458
Lubricating system, improved automatic *1009
Lubricators with Kam clutch drive. Hills-McCanna Co. *122
Motor, drip proof unit type *1046
Motor, explosion proof direct current. Reliance Electric & Engineering Co. *45
Motor-generator set *679
Motor has separable mechanical and electrical parts *1046
Motor protected with drip cover. Reliance Electric & Engineering Co. *382
Motor, synchronous, with fabricated steel stator frame. Electric Machinery Mfg. Co. *309
Motor, totally inclosed. Howell Electric Motor Co. *459
Motor, totally inclosed fan cooled. Louis Allis Co. *83
Motor, totally inclosed fan cooled induction. Lincoln Electric Co. *44
Motor, unit-type induction. Ideal Electric & Mfg. Co. *44
Motors with herringbone rotors. Sterling Electric Motors *162
Motor and reduction gear. Watson-Flagg Machine Co. *202
Oil feed for lubrication of bearings .. *1046
Oil seal, shaft bearing. Gits Bros. Mfg. Co. *161
Oil test set for transformers *971
Oil-testing apparatus. Timken Roller Bearing Co. *308
Packing, square sub-metallic. Johns-Manville Corp. *419
Panelboard, sixteen-circuit. Bull Dog Electric Products Co. *122
Pipe, spiral welded *1008
Powercoater for boiler tubes 897
Pressure snubber to eliminate vibration in gages. Ray Pressure Snubber Co. *309
Pulley covering reduces slippage on belt drives *971
Pulverizer, vertical multi-stage. Heat Utilities Corp. *159
Pump, general service centrifugal *1045
Pump, industrial centrifugal *896
Pumping units with totally inclosed fan-cooled motors. Allis-Chalmers Mfg. Co. *202
Pumps, centrifugal, close coupled *719
Pump, centrifugal, for handling ashes, etc. *718
Pyrometer control, Tycos indicating *719
Radiator, concealed 603
Recorder, smoke density *568
Recording instrument for switchboard. Westinghouse Electric & Mfg. Co. *83
Reducer, speed *604
Register for gas, oil and pulverized coal. Coen Co. *122
Regulator, pilot controlled Mercon *602
Regulator, steam, with air-operated pilot valve. Neilan Co. *161
Regulator, time-cycle. Taylor Instrument Cos. *493
Relay, high speed *604
Relay, improved induction type. Westinghouse Electric & Mfg. Co. *458
Review number ..... Feb. 10
Slide comparator for pH control. Taylor & Co. *493
Speed reduced, oil leakproof vertical worm. Foote Bros. Gear & Machine Co. *457
Speed reducer, small worm-gear. Horsburgh & Scott *382
Splice boxes, cable *568
Stacker elevates and dumps coal into stoker hopper. Lewis-Shepard Co. *45
Starter, air-break "explosion-proof." Louis Allis Co. 202
Starter, automatic, and flexible coupling. *719
Starter, hand-operated A.C. with overload breakers. Allen-Bradley Co. *45
Starter, manual, with push-button reset. Square D Co. *82
Steam trap, inverted bucket *718
Steel, chromium-alloy 567
Stoker, automatic, with revolving-type distributor. Hoffman Combustion Engineering Corp. *81
Switch, disconnecting. Delta-Star Electric Co. *308
Tape, buttonhole, for flange gaskets *642
Terminator, three-conductor. Delta-Star Electric *45
Test kit for boiler water. Kenszey De-Concentrator Co. *458
Tester, insulation *602
Testing kit, portable *643
Thermoplastic compound 971
Transmission, inclosed-design variable speed *568
Trap, compound steam *793
Trap, forged-steel, for high pressures. Wright-Austin Co. *418
Tubes of steel with cast alloy linings .. 1008
Tubing, compensated, for temperature recording instruments *642
"Turbidimeter." Burgess-Parr Co. *82
Turbine, mechanical drive *754
Turbine, small steam. General Electric Co. *83
U-tube, damping, for flow meters. Foxboro Co. *202
Valve, automatic suction, for sump service pump. La Bour Co. *120
